SUMMARY

AI researcher and entrepreneur with expertise in generative AI and LLMs, including developing and training models. Founder of Pollinations.AI, an open-source platform for generative AI. Experienced in developing and scaling AI platforms, APIs, and community building.

WORK EXPERIENCE

1/2022 TILL 3/2023

Founder & Machine Learning Specialist at [Pollinations.AI](#)
| Berlin, Germany

Founded and developed an open-source generative AI platform. Built text and image APIs, model integrations and developer tooling, and supported the project's open-source community.

9/2025 TILL 8/2026

Software Developer at Deel II GmbH
| Berlin, Germany

3/2023 TILL 8/2024

Senior Machine Learning Specialist at [PIXELYNX](#)
| Berlin, Germany · Remote

Led development of the generative AI platform Korus, focusing on audio and video. Implemented APIs and optimized machine learning models for real-time performance, including efficient inference.

6/2019 TILL 1/2022

Machine Learning Specialist at [Pixtunes](#)
| Berlin, Germany

Machine Learning Lead for the Pixtunes orchestra, an AI-based music production system. Secured €1.2 million in EU research funding.

9/2018

Foresight Researcher & AI Visualization Specialist at [Envisioning](#)
| Remote

Researched future trends of AI and technologies impacting sustainability. Led development of AI-driven future visualization projects.

1/2020 TILL 12/2022

AI Visualization Specialist at Cultural Institutions
| Berlin, Germany & Amsterdam, Netherlands

Developed AI-driven future visualization projects for the Humboldt Forum and Amsterdam Dance Event.

3/2018 TILL 6/2018

AI and Art Presenter & Performer at MUTEK, Frontière IA & transmediale
| Montreal, Canada & Berlin, Germany

Presented on AI in art and performed a musical piece using smartphones to create musical swarm intelligence.

3/2008 TILL 3/2016

Freelance Developer at Various Companies
| Brazil

Developed interactive installations using machine learning, computer vision, and data visualization.

10/2006 TILL 2/2007

Software Engineer at [Amazon Development Centre Scotland](#)
| Edinburgh, United Kingdom

Agile development of backend tooling, A/B testing and data mining for sales optimization.

EDUCATION 1/2001TILL1/2006	The University of Edinburgh: Artificial Intelligence and Computer Science Bachelor of Science with <i>First class honors</i> Thesis: Evolving Neural Models of Path Integration
PUBLICATIONS 3/2007	Evolving a Neural Model of Insect Path Integration T. Haferlach, J. Wessnitzer, M. Mangan & B. Webb Adaptive Behaviour 15(3) Developed a neural model of insect path integration using a genetic algorithm, and implemented it on a robot.
AWARDS & PROJECTS	AI-Generated Art and Music Installations Led several AI-driven art and music projects showcasing advanced AI techniques in creative contexts, including 'Marvin's Dream' (AI-generated narrative with spatial sound design), 'Cohabitation' (AI-enhanced urban planning visualization), and 'Traverse' (a project by Google featuring a VR experience with AI-generated soundscape).
LANGUAGES	English (Native speaker)German (Native speaker)Portuguese (Full professional)French (Basic conversational)
SKILLS	Software Engineering: Distributed Computing, Full Stack Development, API Development, Python, JavaScript, TypeScript, Node.js, Git, Docker, Kubernetes Machine Learning: Deep Learning, Generative AI, Large Language Models (LLMs), Diffusion Models, Computer Vision, Natural Language Processing, PyTorch, TensorFlow, Prompt Engineering, Fine-tuning, Model Serving, API Development, Data Processing Pipelines, Data Visualization Cloud Computing & AI Platforms: AWS, Google Cloud, Microsoft Azure, OpenAI API, Hugging Face, Replicate Soft Skills: Open Source Project Management, Community Building, Technical Leadership, Cross-functional Collaboration, Problem Solving, Communication with Technical and Non-technical Audiences
